

Time to slow down City growth?

Posted by MackD - 2010/08/13 12:45

It seems the Good Old City government is striving to turn this city into a major suburb of Detroit. They want more taxes but restrict the citizens more and more.

I know our city was a peaceful city back in my youth days but today it appears to becoming out of control.

I seriously hope they hide the truth when promoting the new technology park from the perspective businesses. We surely don't want them to know about the "we own your property" attitude Tecumseh Government has now would we?

Do they realize the truth why we are loosing businesses? Tecumseh Products, Faraday, GM, and other small ones? Their restrictions against them just like those against the citizens.

With the economy as is the best way to keep your city popular or intresting is to keep it small and freindly. The problem is there is no way a nice city can stay small. They are by attempting to force it's continued smallness eating away at it, sadly. It should although not take them long to realize the negtive behind their actions we can only hope.

-GoodLuck
