TO: Red Mill Property Owners
RE: Red Mill Pond Lake Level

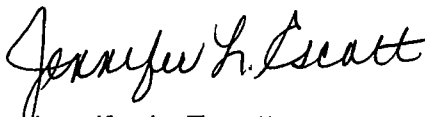

On August 31, 2021 during a routine inspection some leaks were discovered in the South bay stop logs of the Red Mill Pond Dam. These leaks are affecting the elevation of the pond. We are currently working with the Michigan Department of Environment, Great Lakes and Energy (EGLE), specifically with the Dam Safety Unit on making some emergency repairs to the Dam. During the coming weeks, the level of the pond will continue to fall gradually until such time as the repairs will be made in connection with a scheduled drawdown.

This office is diligently working on obtaining the required emergency approval from EGLE along with an engineering firm to get the plans and supplies in place for repairs as soon as possible.

We will notify you when this repair will occur, and we hope it can be completed within a day or two.

If you have any questions, please call this office at (517) 264-4696.

Respectfully,

Jennifer L. Escott
Lenawee County Drain Commissioner
